## QuantumFuture Scientific Software ISV Benefits Program

Dear Valued Partners,

We are thrilled to introduce the QuantumFuture Scientific Software Independent Software Vendor (ISV) Benefits Program—a pioneering initiative aimed at fostering collaboration between QuantumFuture and esteemed scientific software companies like yours. At QuantumFuture Scientific Software LLC, we firmly believe in the power of synergy and joint expertise to revolutionize the scientific software landscape and provide our customers with unparalleled solutions.

The ISV Benefits Program has been meticulously crafted to offer a myriad of advantages, forging a path towards mutual success and delivering superior scientific solutions to a wider customer base. We are excited to share the core benefits of this program with you:

1. **Free Licensing and Royalties:** We understand that investing in licensing costs can be a significant barrier for ISVs. To ease this burden, we are extending one or more licenses to ISVs without any upfront costs. This means that you can seamlessly integrate and distribute QuantumFuture's cutting-edge software without financial constraints. As an added incentive, we are delighted to provide the first 1,000 node hours—equivalent to a remarkable \$1,000.00 value—completely free of charge. Furthermore, you will receive a 10% royalty on all purchased QF license fees associated with your licensing accounts, ensuring a continuous stream of benefits.
2. **Early Access to New Features:** We believe that staying at the forefront of technological advancements is paramount to your success. As an ISV partner, you will be granted exclusive access to newer features and special developmental Beta versions of QuantumFuture applications. Embrace the opportunity to dazzle your customers with state-of-the-art solutions, well before they are available to the general public. Early access

empowers you to be the trendsetter in your domain and elevate your offerings to new heights.

3. **Research and Development Cooperation:** Collaboration is the cornerstone of innovation. Our ISV Benefits Program extends an open invitation for scientific research and/or software development cooperation. Together, we can explore uncharted territories, enhance existing products, and forge novel solutions that cater precisely to the unique needs of our customers. By pooling our collective expertise and resources, we can unlock untapped potential and achieve remarkable results.

At QuantumFuture, we view ISV partnerships as an essential avenue for growth and excellence. The combined software solutions that emerge from such collaborations invariably offer unrivaled benefits, not only for our companies but, more importantly, for our valued customers. By working hand in hand, we envision a future where scientific boundaries are pushed, and breakthroughs are realized.

We are eager to embark on this transformative journey with you, our esteemed ISV partners. Together, let's shape the future of scientific software and forge a legacy of innovation and success. To enroll in the ISV Benefits Program or inquire further about its details, please reach out to our dedicated partnership team at [support@qfsciences.com](mailto:support@qfsciences.com). Let's create something extraordinary, together.

Thank you for being an integral part of QuantumFuture's quest to advance scientific solutions beyond the horizon.

Sincerely,  
Laszlo Fusti-Molnar,  
Owner and CEO,  
QuantumFuture Scientific Software LLC
